

# Quality Policy

Through clear management focus and commitment, to comply with requirements and to continually improve the effectiveness of the quality management system by continued investment in training, systems, and state of the art equipment, IQE will deliver continued quality improvements in all aspects of its business.”

IQE shall maintain and continually improve a well-implemented QMS, enabling us to profitably manufacture products that satisfy our customers.

It is fully acknowledged by the senior management that the future success of the organization depends upon the company’s ability to maintain and enhance its reputation as a quality supplier. Such policies will be communicated, understood and reviewed for their continued suitability. Top management meetings will review and establish new quality objectives with the aim of continually improving the Quality Management System.
